Maharaj Vijayaram Gajapathi Raj College of Engineering (Autonomous)
DEPARTMENT OF DATA ENGINEERING

Course: BTech | **Regulation: R23**
Batch: 2023-27 | **AY: 2026-27**
Semester: VII
Course Title: Major Project | **Course Code: R23MSCSP003**

Major Project Schedule and Guidelines

S.No.	Date	Scheduled Task	Deliverables	Evaluation
1	18.07.2026	Guide Approval Letter	Guide Approval Letter duly signed by the respective guide	Project Coordinator with Guide Approval
2	25.07.2026	Project Abstract	• Project Title • Abstract duly signed by the respective guide	Project Coordinator with prior Guide Approval
3	17.08.2026 to 19.08.2026	Review–I	• Literature Survey (Minimum 5–10 recent research papers) • Problem Statement • Objectives • System Architecture / Methodology • Gantt Chart/Project Timeline	Department Project Review Panel with prior Guide Approval
4	19.09.2026	Review–II	• Experimental Setup • Results and Analysis • Draft Research Paper	Department Project Review Panel with prior Guide Approval
5	03.10.2026	Review–III	• Complete Project Implementation • Project Documentation verified and signed by the respective guide • Final Research Paper	Department Project Review Panel with prior Guide Approval

Note: ***All reviews are conducted as scheduled. If any deviation from the schedule occurs, it will be communicated in advance.***

Project Guidelines

1. Guide Meetings

- Without guide approval, Project Review Meetings will not be conducted.
- Students must meet their guide **at least once every week**.
- Maintain a **Project Log Book**, signed by the guide, at every meeting.
- Implement the suggestions provided by the guide before the next review.

2. Literature Survey

- Refer to recent IEEE, Springer, Elsevier, ACM, Scopus, or Web of Science publications. (2023 to 2026 if applicable)
- A minimum of **5-10 research papers** should be studied.
- Proper citations and references are mandatory.

3. Review Attendance

- All team members must attend every review.
- Absence from the review may result in a deduction of marks.
- Each member should be able to explain the entire project.

4. Plagiarism Policy

- Plagiarism in a project report or paper should be avoided.
- Copying source code from online repositories without proper acknowledgment is prohibited.
- AI-generated content must be verified, modified appropriately, and cited where required.

5. Coding Standards

- Follow proper coding conventions.
- A GitHub repository is mandatory for every team.
- Use Git/GitHub for version control wherever possible.
- Comment the code appropriately.
- Demonstrate individual contribution during reviews.

6. General Instructions

- Adhere strictly to the project schedule.
- Regularly back up source code and documentation.
- Maintain professional ethics throughout the project.
- Ensure all software used is properly licensed or open source.
- Obtain the guide's approval before making major changes to the project scope.
- Complete all deliverables before the specified deadlines.
