KADAMBALA JYOTSHNA

Vishakhapatnam, India | 8328639168| kadambalajyotshna@gmail.com| Linkedln |Github |

Computer Science (Data Science) undergraduate with a strong foundation in JavaScript, SQL, DBMS, computer networking, and technical troubleshooting. Experienced in developing interactive dashboards, working with structured data, and solving technical issues through academic and project-based work. Familiar with web technologies, REST APIs, software testing, system integration, and AI-assisted tools. Strong problem-solving and communication skills with an interest in full-stack engineering and platform support.

TECHNICAL SKILLS

- **Programming:** JavaScript, SQL, Python, Java
- **Web Technologies:** HTML, CSS, React.js, REST APIs
- **Databases:** SQL, MySQL, SQL Server, DBMS
- **Tools & Version Control:** Git, GitHub, VS Code
- **Testing & Troubleshooting:** Software Testing, Debugging, Data Validation, Technical Troubleshooting, System Integration
- **Data & Analytics:** Power BI, Power Query, DAX, Excel
- **Data Analysis & Tools:** Pandas, Advanced Excel (Pivot Tables, Charts, Functions), Power BI (Desktop & Service), Power Query (ETL)

PROJECTS

AI Study Planner | Full Stack | Github

- Developed a full-stack web application using **React, Flask, SQLAlchemy, and SQLite** to generate personalized study plans based on subject, difficulty, duration, and available study hours.
- Implemented **JWT-based user authentication**, REST APIs, progress tracking, study-session management, and interactive analytics for monitoring learning progress.
- Built responsive frontend components with **React, Material UI, and Recharts**, with backend validation, CORS handling, and user-specific data management.
- Deployed the application using **Render** and integrated frontend-backend communication through RESTful APIs.

Technologies: *React, JavaScript, Flask, Python, SQLAlchemy, SQLite, REST APIs, JWT, Material UI, Render*

Shield Insurance Business Performance Dashboard | Power BI Github

- Developed an interactive Power BI dashboard to analyze insurance business performance across revenue, customers, policies, and sales channels.
- Built KPI-driven dashboards and analyzed revenue and customer growth trends across cities, sales channels, policy types, and customer segments.
- Used Power Query, DAX, data modeling, and interactive visualizations to transform data into actionable business insights.
- Identified key trends such as highest revenue from Delhi NCR, Offline-Agent as the leading sales channel, and the 36–45 age group as the largest customer segment.

Technologies: *Power BI, Power Query, DAX, Data Modeling, Data Visualization*

EDUCATION

Bachelor of Engineering in Computer Science – Data Science **Aug 2023 – Apr 2027**

MVGR College of Engineering, Vizianagaram

ACHIEVEMENTS

- Recognized for presenting an outstanding Problem Statement Proposal in the **Google Solution Challenge 2025**, demonstrating innovative problem-solving and technical feasibility.
- Secured **1st Prize** at IGNITE HACK, a college-level hackathon, for developing an innovative technology-based solution.
- Secured **5th Prize at GENZPULSE Hackathon**, a college-level competition, for building an object identification and simulation-based system leveraging advanced technologies.

CERTIFICATIONS

- **Cisco Networking Academy (2025):** Python Essentials 1 and 2, CCNA Introduction to Networks, CCNA Switching, Routing, and Wireless Essentials, CCNA Enterprise Networking, Security, and Automation, Introduction to Data Science, Apply AI Analyze Customer Reviews, Introduction to Modern AI
- **Udemy (2025):** Python for Data Analysis, Microsoft Power BI
- **CodeBasics (2026**): Excel, Power BI, Python, SQL
- **IBM (2024):** Getting Started with Data Analytics
- **Workshop (2025):** AI Tools
